

INTRODUCTION

Just A word about myself, I'm a third-generation Art Director / Production Designer. With traditional design training from my peers and a Bachelor of Arts in Architecture and Design, I have managed to incorporate computer design and imaging with my design work. I have found that with software packages such as SketchUp, LightWave3D, Twinmotion & Photoshop, Illustrator, DAZ 3D, & Turbo CAD, I can give the Production team a very clear idea of what sets and scenes, are going to look like.
