

**Artist Statement:**

As a Production Designer, I create sets and environments not just for the camera, but for the actors and rest of the crew as well. I have found that creating a believable, well-researched and detailed environment can help elevate all departments' efforts as well as the production value. Collaborating and coming up with creative solutions are my greatest strengths. I am consistently able to bring the best to the table, no matter what type of budget or location I am dealing with. I am always able to utilize my surroundings, no matter what part of the world I may find myself in. I am a natural leader, with a special eye for seeing the capabilities of my crew and helping everyone rise to success.
