I'm an assistant art director/art director based in Los Angeles, with over 15 years of experience bringing stories to life. I've designed and art directed feature films, music videos and commercials. Recently I have been assisting art directing television series like Quantum Leap and American Primival.

My background is unique, blending art and design. After studying fine arts in Poland, I spent time in France and London restoring antique furniture and creating original designs. I then transitioned to film, graduating from the Polish National Film School and working as an animator, graphic designer, and illustrator before becoming an art director.

This diverse skillset, coupled with my strong foundation in fine arts, furniture, art history, and film, informs my work. I adapt easily to different styles and collaborate effectively with production designers to achieve their vision, utilizing my understanding of cinematic language to bring their ideas to life.

I'm a member of the Art Directors Guild..

US/EU citizen.
