

WE ARE WHO WE ARE

DESIGN PRESENTATION

ELLIOTT HOSTETTER

We took over 17 acres of abandoned buildings and overgrowth and turned it into a military base in 3 months. We completely rebuilt the water supply and electrical system from scratch. We used all the spaces inside and out as sets. Sets were fully integrated into the real situation and included a football field, school gym, supermarket, food court and shopping area, movie theater, library, chapel, infirmary, mess hall, check point, training field (including a parachute jump tower), post office, parking lots, a swimming pool and locker room, and a neighborhood with 3 new houses from scratch. We had to bring all new grass and trees and bushes and laid irrigation for the whole system. We added new floors onto buildings and re-imagined the interior spaces on old ones.
