PRODIGY CITY

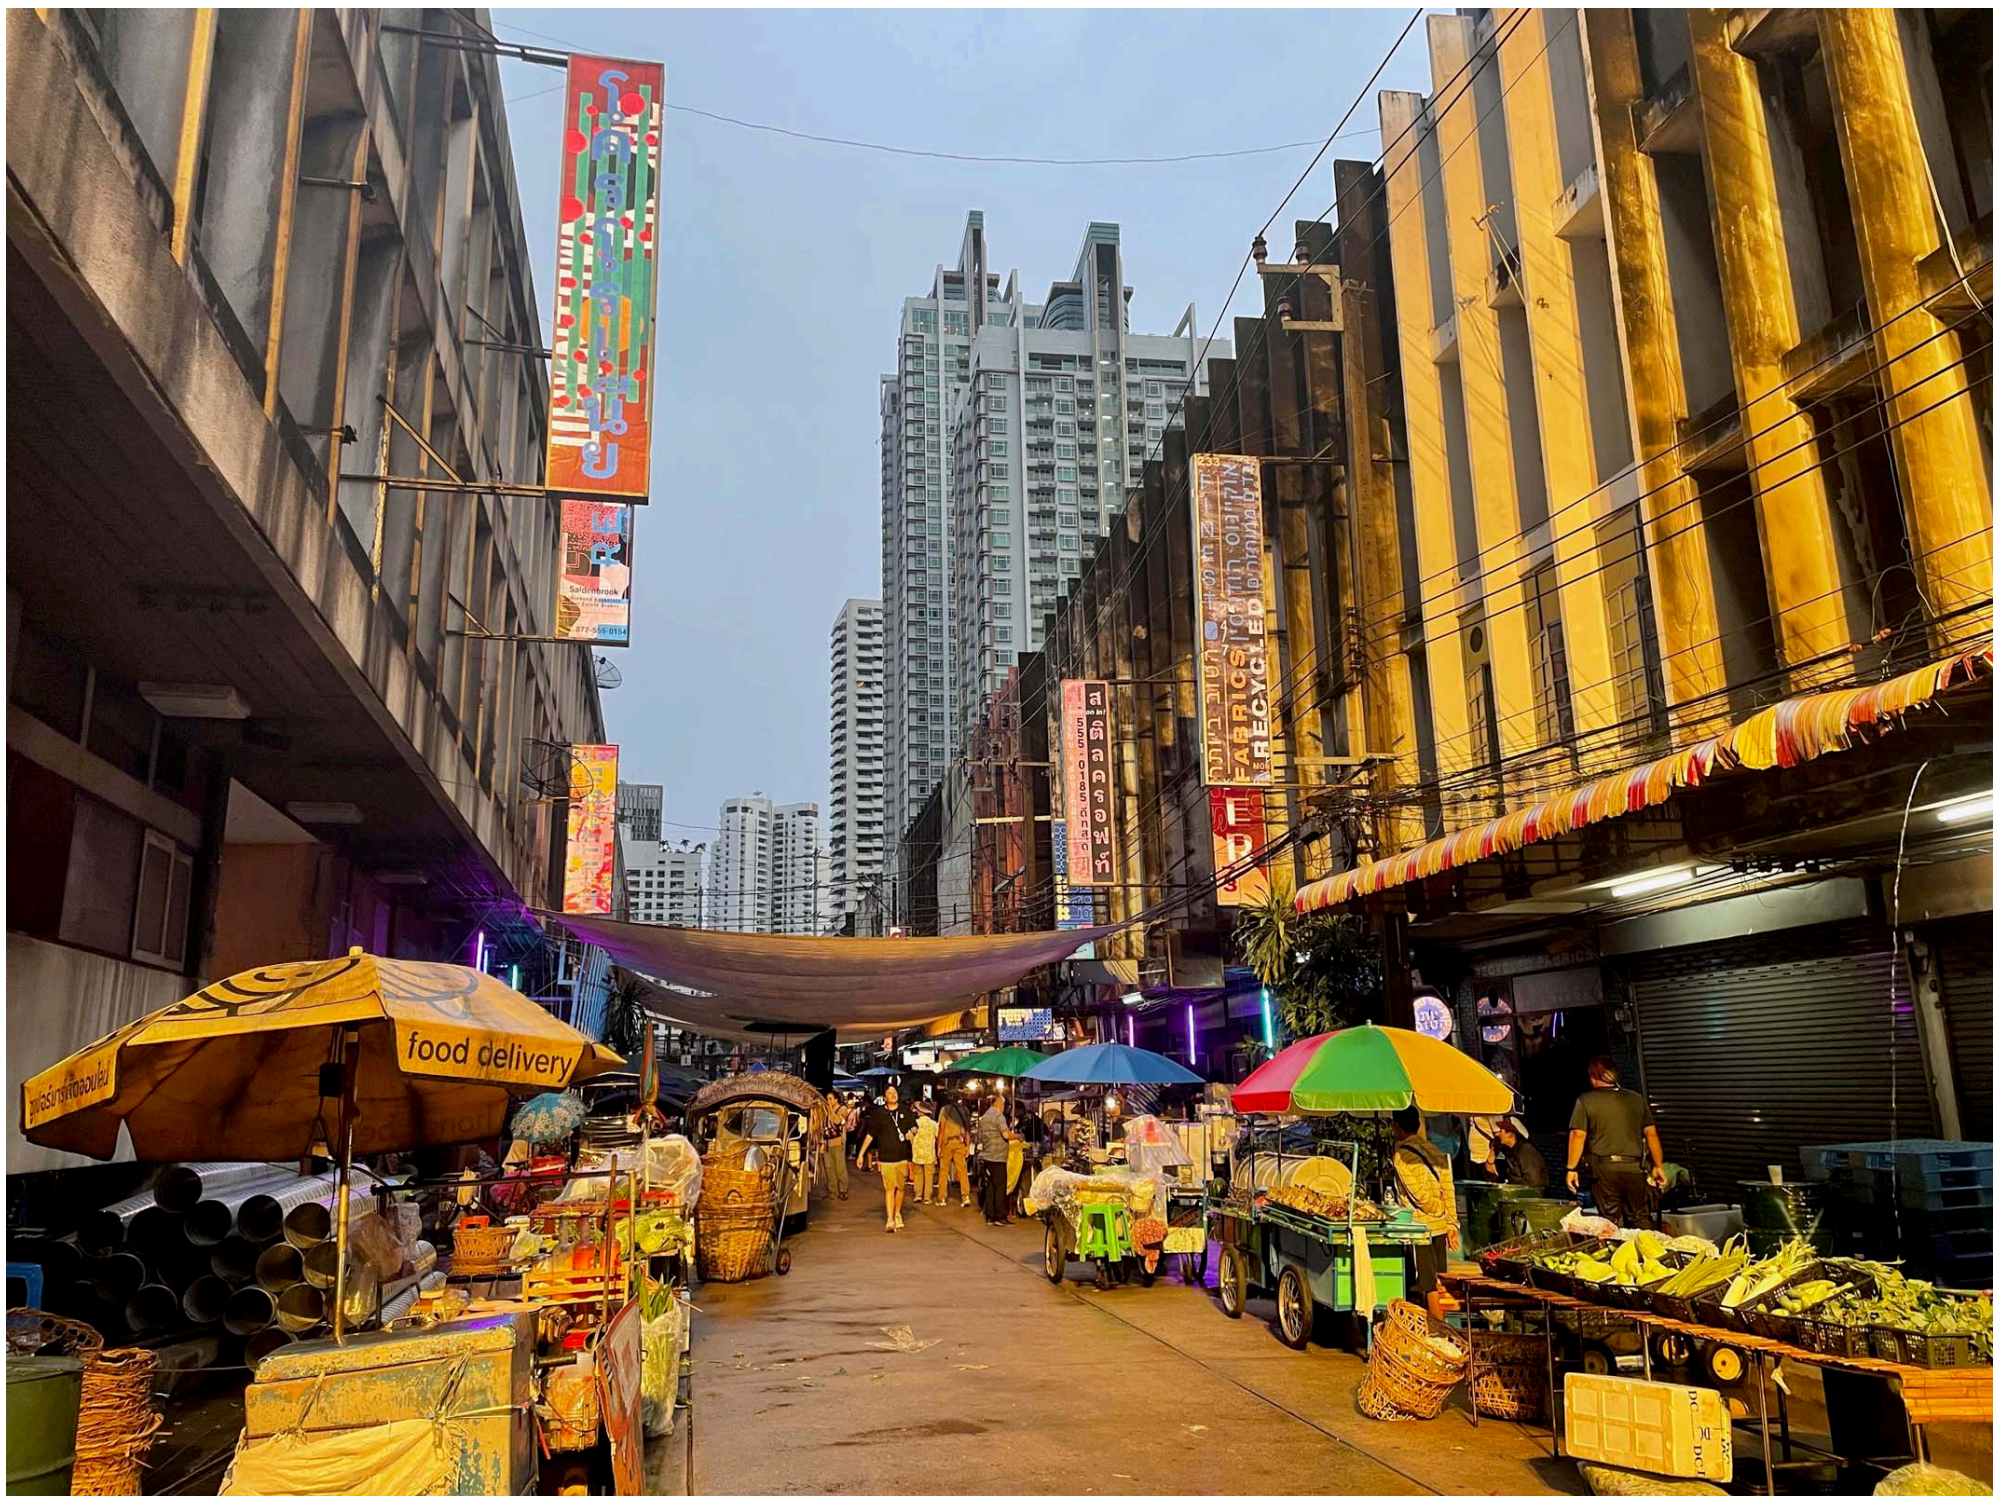

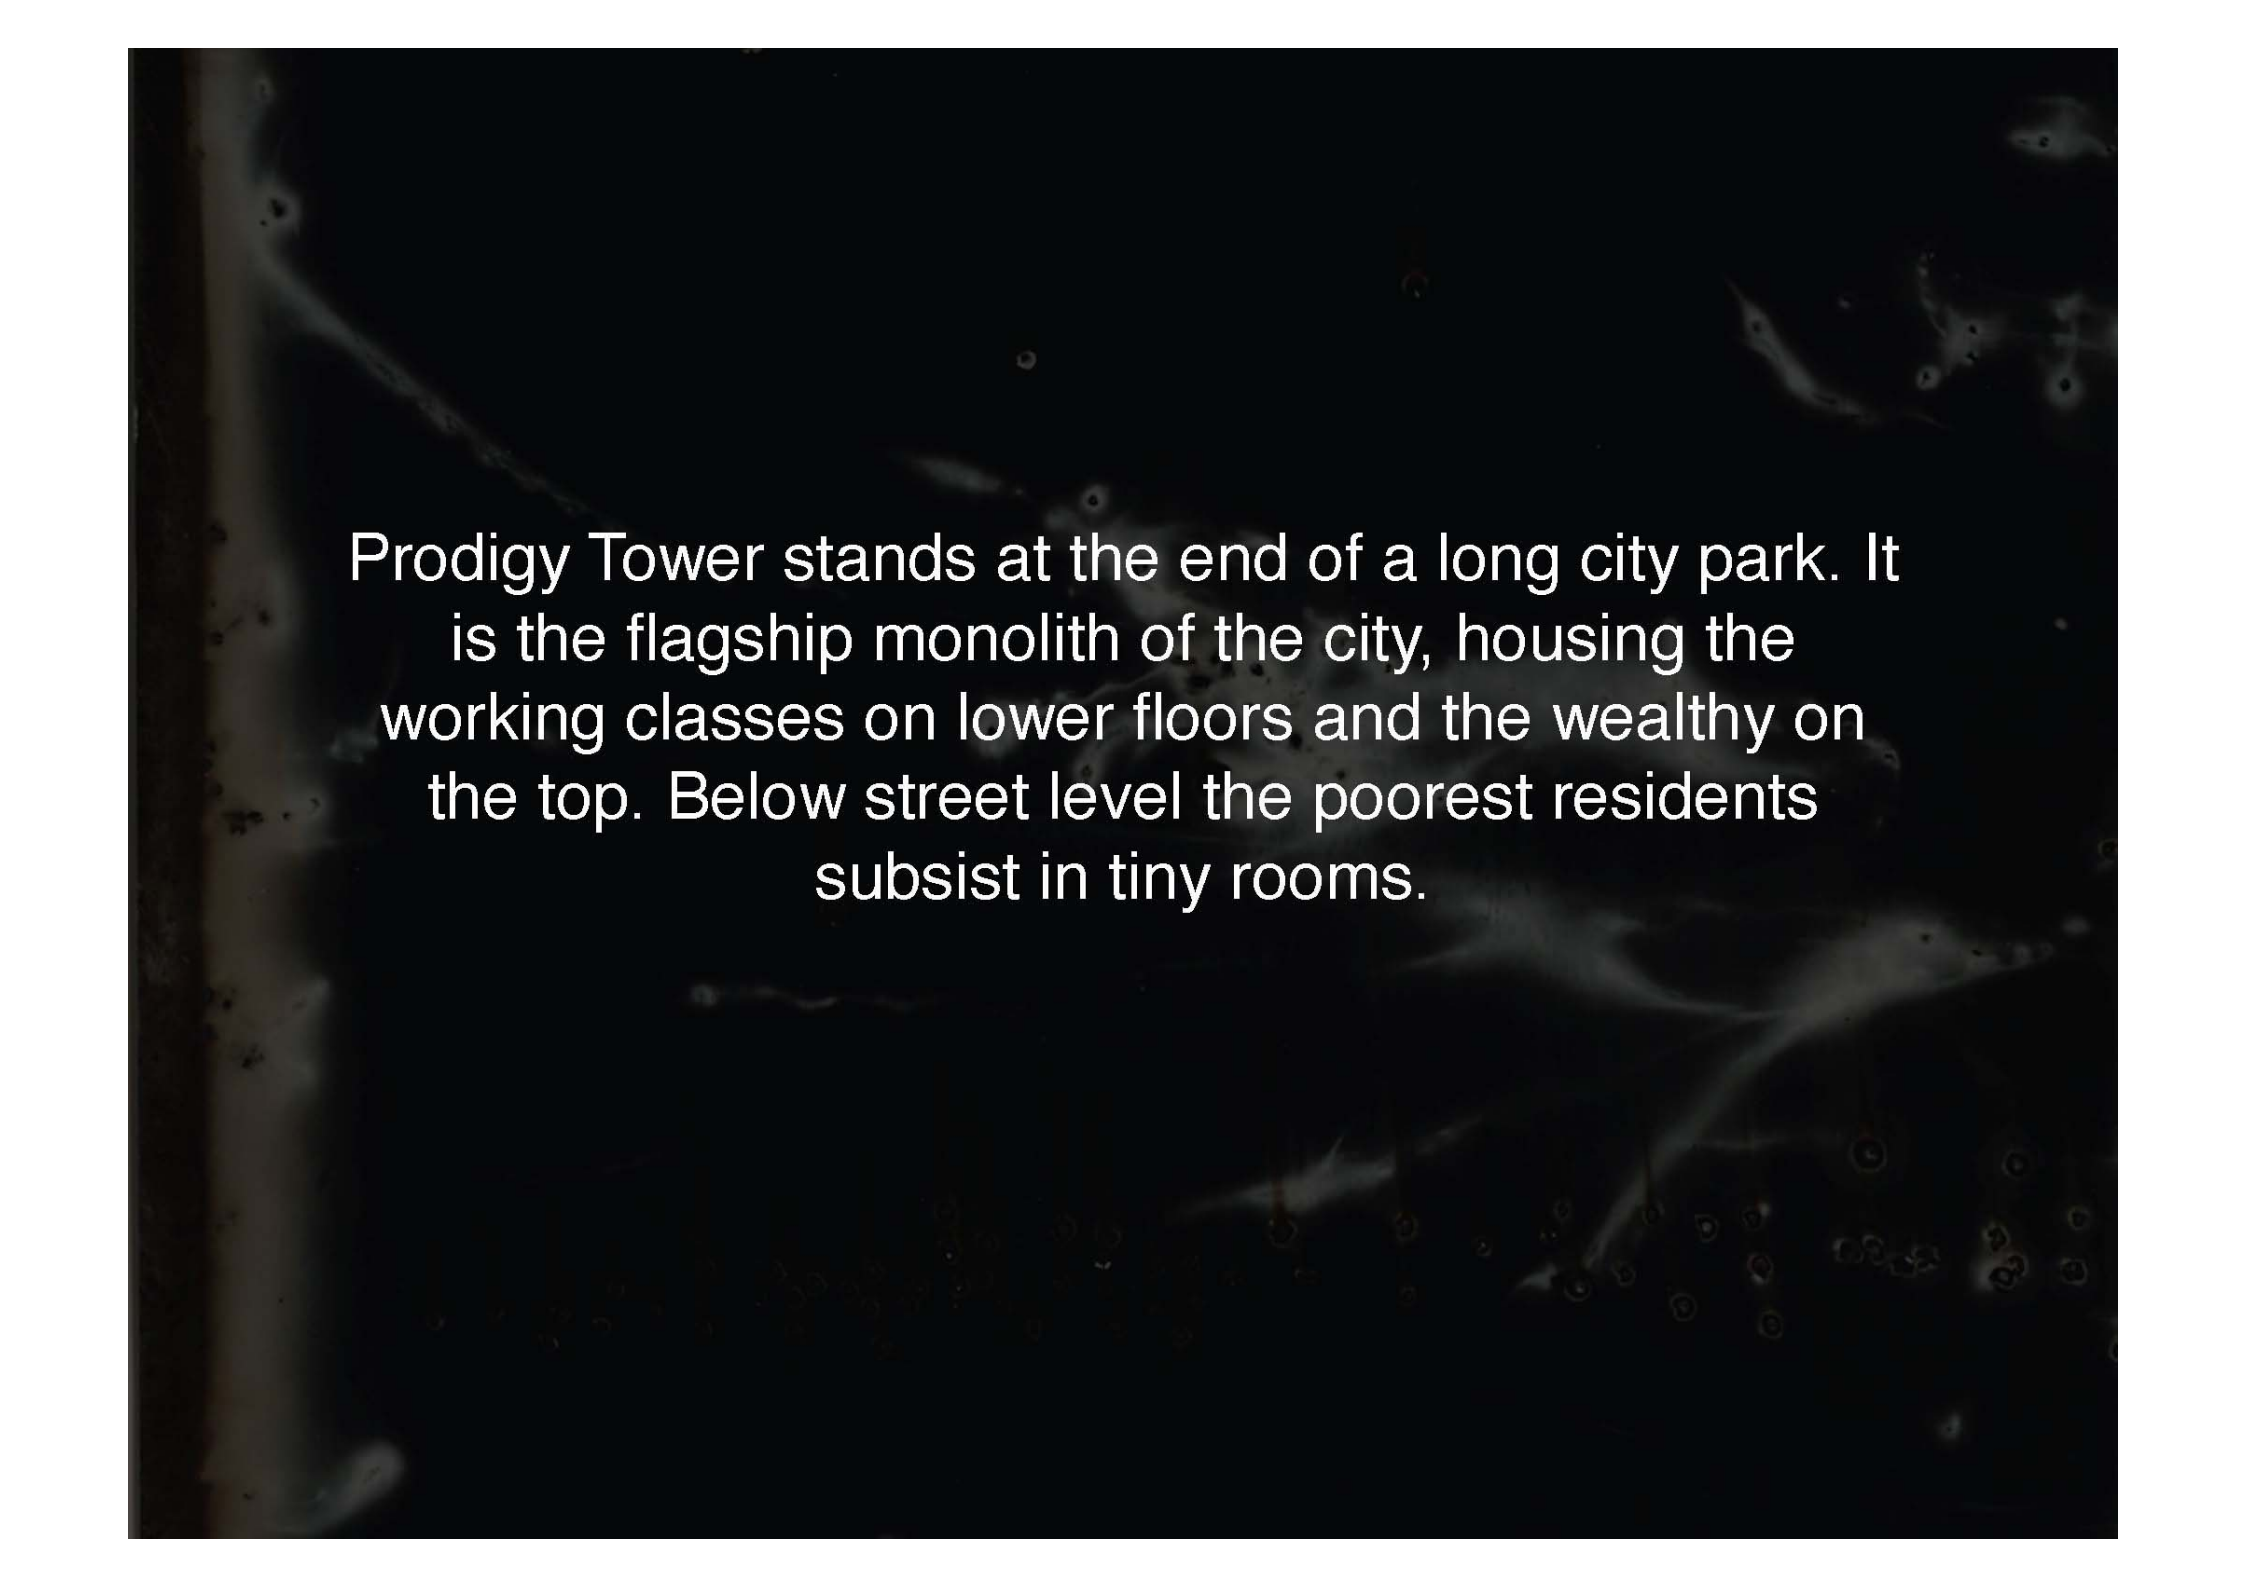

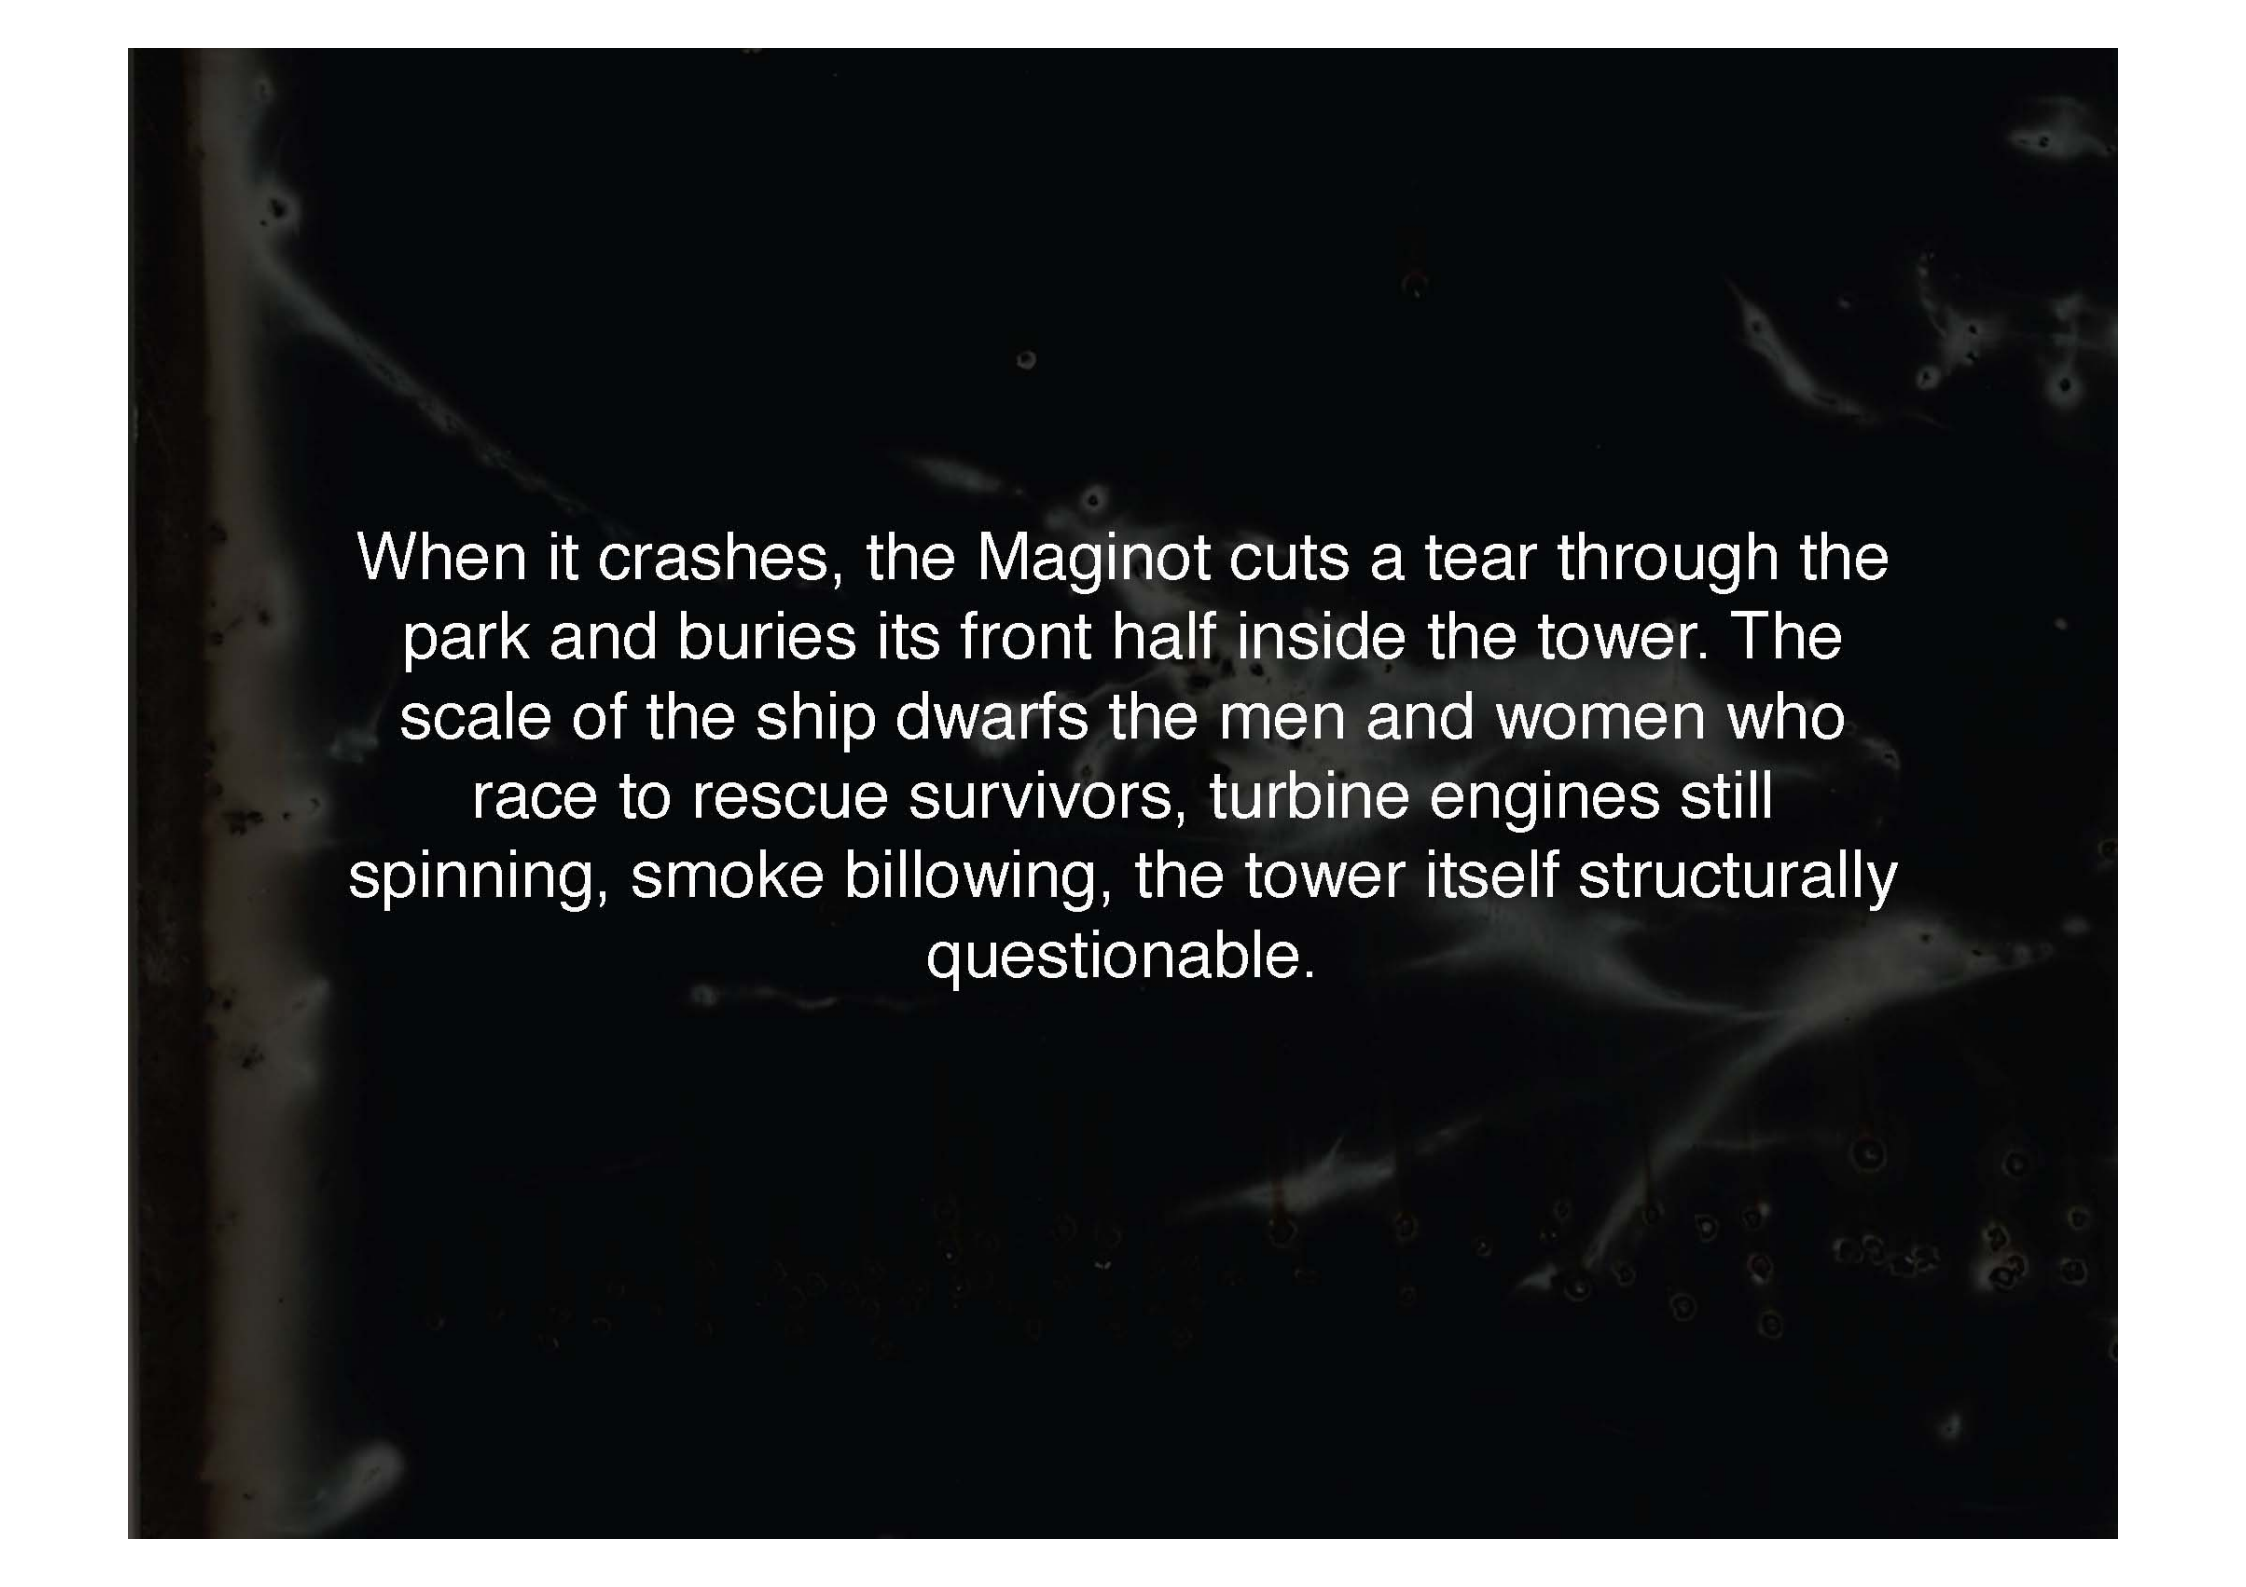

PRODIGY TOWERS

Prodigy Tower stands at the end of a long city park. It is the flagship monolith of the city, housing the working classes on lower floors and the wealthy on the top. Below street level the poorest residents subsist in tiny rooms.

When it crashes, the Maginot cuts a tear through the park and buries its front half inside the tower. The scale of the ship dwarfs the men and women who race to rescue survivors, turbine engines still spinning, smoke billowing, the tower itself structurally questionable.

BOY KAVALIER'S OFFICE

The background of the slide is a dark, grayscale microscopic image. It shows various cellular structures, including elongated, spindle-shaped cells and numerous small, circular cells, some of which appear to be in clusters. The overall texture is grainy and complex, typical of a biological specimen under a microscope.

TECH LAB

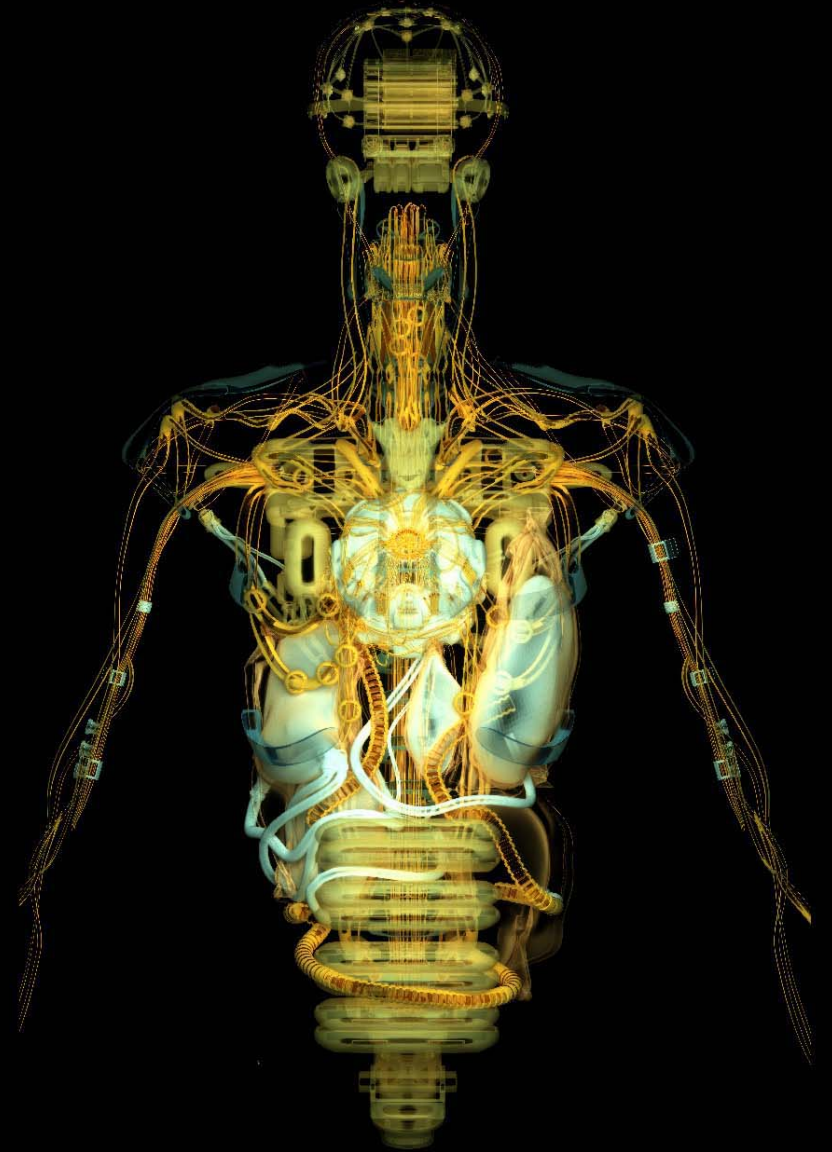

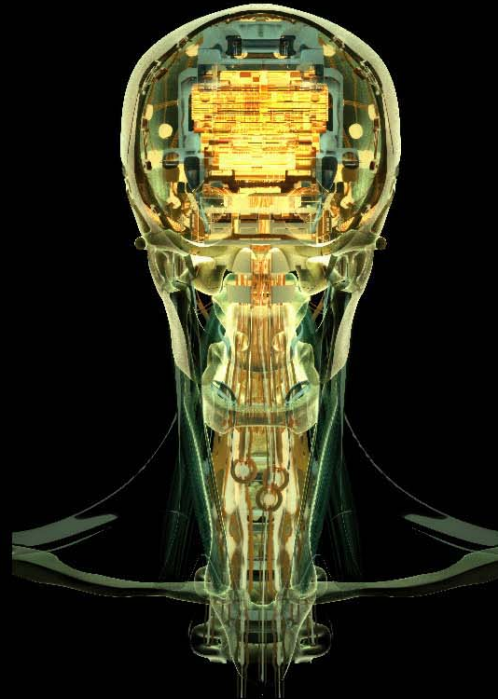

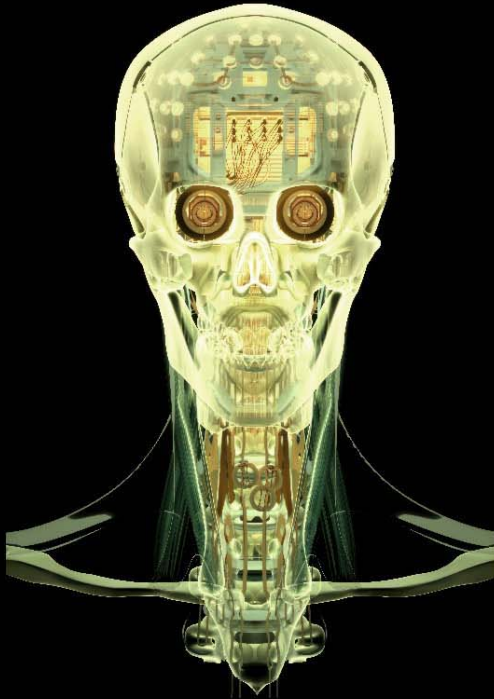

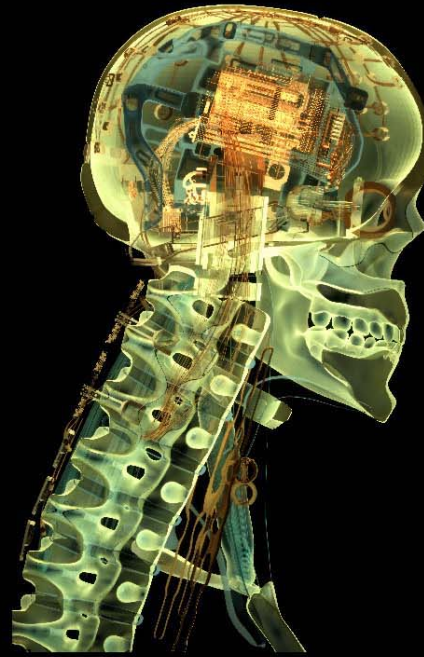

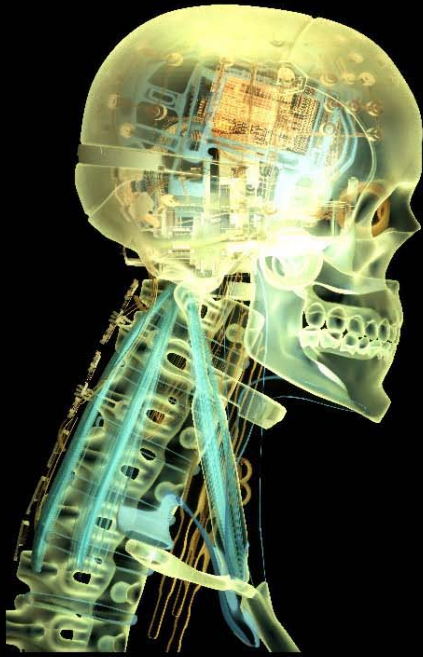

The image features two translucent human figures against a dark background. The figure on the left is shown in profile, revealing a complex internal structure of mechanical parts, including a large circular component in the chest and a rectangular unit at the base of the spine. The figure on the right is shown from the front, displaying a dense network of wires and electronic components throughout the torso and head. The overall aesthetic is futuristic and technological.
