Church sideview.

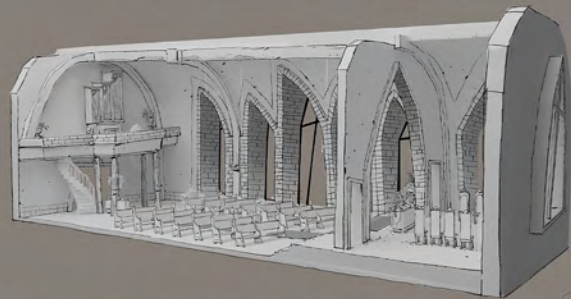

Twits Church

Church overview.

Handmade feel:

Everything on the set should have this irregular unbalanced, imperfect feel. As it got worn down by life. From the big elements to the small things, everything carries that here.

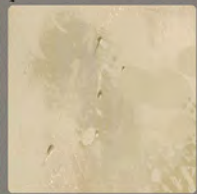

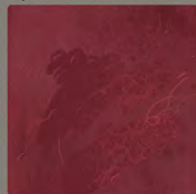

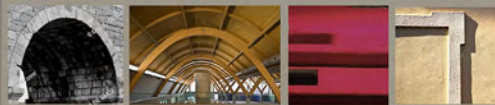

Church main reference:

We used this church as a main reference, we thought that this archs are very iconic. We changed the materials, mixing stones archs with concrete walls.

References, Textures and colors:

Again, just as a guide.

Maybe altar wall can have a slightly different color, as it was quickly painted.

Some refs

Doors and proportion:
Doors can be slightly uneven on the outside, but it can be aligned on the inside. Make sure that even a straight line can have subtle variations.

it's like drawing without a ruler, freehand. That's when we can have "the hand of the artist feel".

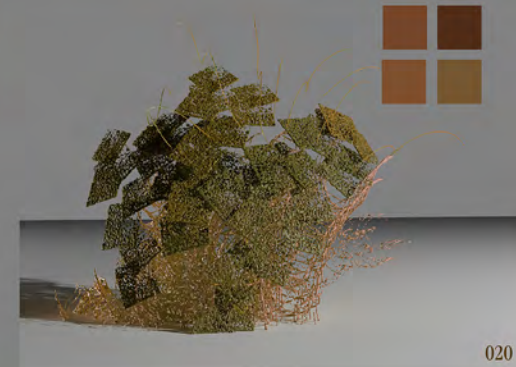

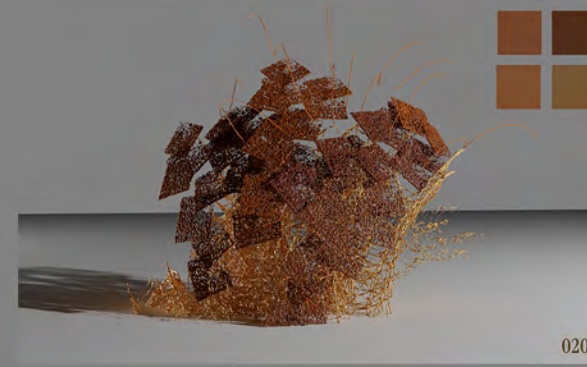

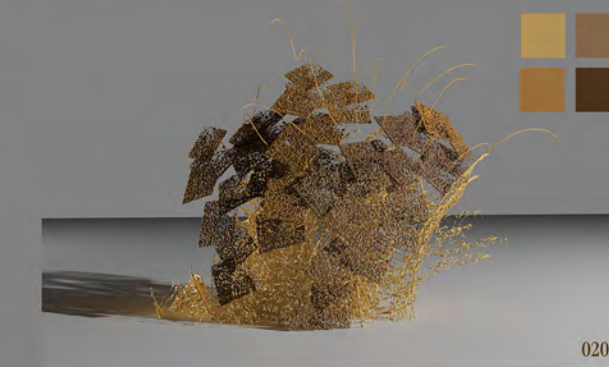

Twitshouse-ext

dry vegetation examples.

texture:

We really like the approach with brushstrokes not following the shape.

Twitshouse-ext

fronthouse vegetation.

We don't want everything to feel busy, using mainly this simpler procedural grass will help building big masses and help creating contrast.

Remote Control.

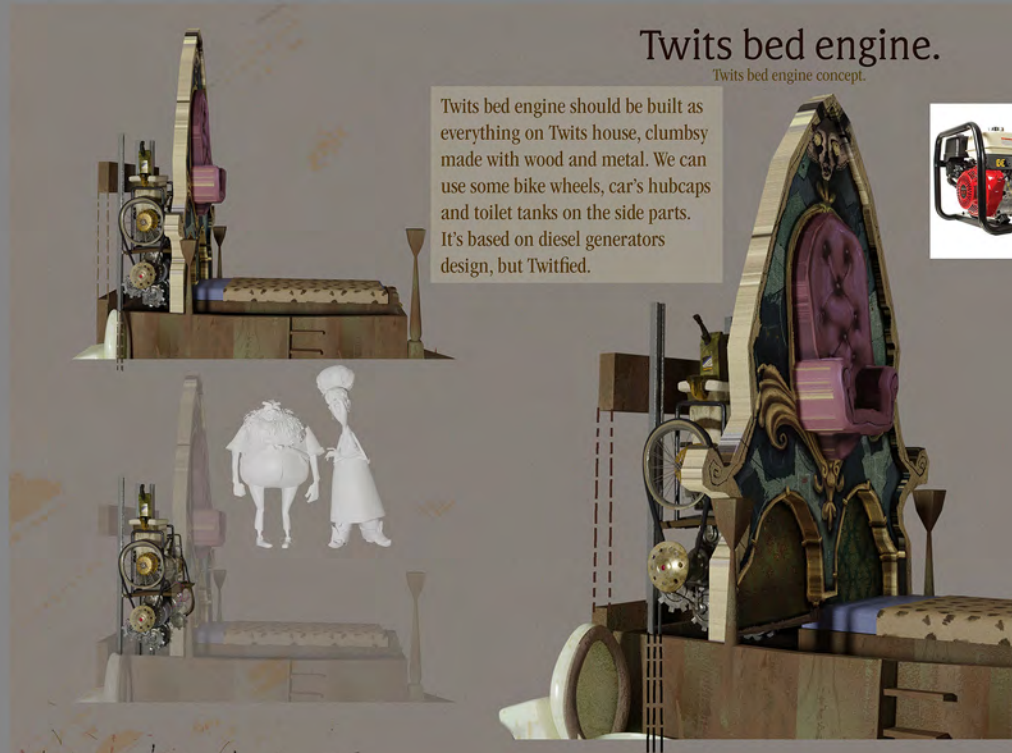

Mr and Mrs Twit remote.

Twits bed engine.

Twits bed engine concept.

Twits bed engine should be built as everything on Twits house, clumsy made with wood and metal. We can use some bike wheels, car's hubcaps and toilet tanks on the side parts. It's based on diesel generators design, but Twitfied.

Twits bed engine.

Twits bed engine concept.

Same objects duplicated to each side and rearranged. In case we need to see this moving with the beds, engine will travel with it, that's why we should have two, one on each side.

We probably won't see the back part so again, simplify if needed please.

Maybe we can have a light on the center of the hubcap so we clearly see when it starts to work, kind of a response to the remote control the Twits have.

We still don't know how much of this we will see. Remi wanted a sense of moving parts, everything don't necessary needs to make sense so, simplification is always welcome if needed.
